

Dear Colleagues,

this one-day Certification II Revision Course is aimed primarily at experienced orthopedic and trauma surgeons and guides you systematically and pragmatically to the autologous bone dowel press fit technique for ligament reconstruction in the knee and is a refreshing in basics after Certification I.

Participants will learn in this course Cert II in 4 workshops REVISION STRATEGIES on basis of Cert I and refresh techniques of harvesting and processing of bone dowles with the hollow reamer system for ACL revision in TWO- or SINGLE STEP. This training is a Re-Certification and also basis to participate at „BIO ADD ON Contract“.

Cert II course is about Revision of ACL & PCL in a single step, Healing Response & OATS.
